**How to Complete the ESPGHAN IUS Training Curriculum**

The ESPGHAN Intestinal Ultrasound (IUS) Training Curriculum is a structured educational programme designed to provide paediatric gastroenterologists with the theoretical knowledge and practical skills required to perform intestinal ultrasound examinations.

The curriculum consists of four consecutive steps, combining theoretical education, practical workshops, supervised hands-on training and a final competency assessment.

**Step 1 & Step 2 – Getting Started**

The first step towards completing the IUS Training Curriculum is to register for **Step 1 and Step 2**, which are organised during the **ESPGHAN Annual Meeting**.

Registration for these courses is available through the Annual Meeting registration system, where participants can select the dedicated IUS training sessions.

Both steps must be completed before proceeding to the next stage of the curriculum.

**Step 3 – Supervised Hands-on Training**

After completing Steps 1 and 2, participants are expected to undertake **Step 3: Supervised Hands-on Training**.

This stage involves performing at least **50 supervised intestinal ultrasound examinations** at an approved training centre, under the guidance of an experienced IUS trainer.

Participants should aim to complete this stage within the year following their initial training at the ESPGHAN Annual Meeting.

**Step 4 – Final Competency Assessment**

The final stage of the curriculum is **Step 4**, which takes place during a subsequent ESPGHAN Annual Meeting.

Participants must register for Step 4 through the Annual Meeting registration system.

This stage includes two components:

- **Theoretical examination** – assessing knowledge of intestinal ultrasound principles, indications, interpretation and clinical applications.
- **Practical examination** – evaluating the participant's ability to perform and interpret intestinal ultrasound examinations.

Successful completion of both components marks the completion of the ESPGHAN IUS Training Curriculum.

**How Long Does It Take to Complete the Curriculum?**

The curriculum is designed to be completed within **one to two years**.

The fastest pathway is to complete Steps 1 and 2 at one ESPGHAN Annual Meeting, undertake supervised training during the following year, and complete Step 4 at the next Annual Meeting.

Participants are encouraged to complete the entire curriculum within two years of starting their training.

**ESPGHAN and IUS SIG Membership**

Participants wishing to complete the IUS Training Curriculum must be **ESPGHAN members**.

After successfully completing all four steps of the curriculum, participants become eligible to apply for membership in the **ESPGHAN Intestinal Ultrasound Special Interest Group (IUS SIG)**.

**Exceptions:** Individuals with documented substantial research experience in intestinal ultrasound may be considered for IUS SIG membership without completing the standard training pathway. Such applications will be reviewed individually by the IUS SIG Steering Committee.

**Ready to Start?**

If you are interested in developing your intestinal ultrasound skills, we encourage you to register for **IUS Steps 1 and 2 at the next ESPGHAN Annual Meeting**.

We look forward to welcoming you to the ESPGHAN IUS training community!
